The government's master plan for the development of the country provides a framework for coordination and cooperation across all ministries, states and regions. In short, the MSDP recognises the role of the private sector as the primary engine of economic growth and job creation and it prioritises market-based solutions. #### A Private Sector Perspective – Attracting Foreign Investments to Myanmar

Myanmar's recent transition out of five decades of economic and political isolation provides an opportunity for the country to secure much needed investment to build basic infrastructure for its citizens and facilitate growth in its fast-growing sectors.

Such projects will require massive amounts of capital and specialised expertise, and Foreign Direct Investment (FDI) will be an important source of capital, technology and knowledge in these endeavours.

In this series of four keynote presentations, representatives from the International Finance Corporation, New Yangon Development Company Limited, China, and Japan will provide a 360-degree perspective on the next steps for Myanmar to transform itself into an attractive FDI destination for foreign investors.
